Professional Summary

Aspiring DevOps Engineer with hands-on experience in Linux, AWS, Docker, Terraform, Git, and GitHub Actions. Built practical projects involving cloud infrastructure automation, containerized application deployment, and CI/CD pipelines. Familiar with Infrastructure as Code, container orchestration, networking fundamentals, and automation using Bash and Python.

Education

Kamla Nehru Mahavidyalaya Nagpur, Bachelor of Computer Application (BCA) 2022–2025
| RTM Nagpur University

Skills

- **DevOps & CI/CD :**(GitHub Actions, CI/CD Automation)
- **Cloud**: AWS (EC2,VPC,IAM,Security Groups)
- **Version Control:** Git, GitHub
- **Containers**: Docker
- **Infrastructure as Code**: Terraform
- **Operating Systems:** Linux
- **Networking:** DNS, Load Balancers, Firewalls
- **Scripting**: Bash, Python
- **Monitoring:** Prometheus, Grafa
- **Configuration**: Ansible

Projects

CI/CD Pipeline for Node.js Application *GitHub Actions | Docker | AWS EC2 | Git | Node.js*

- ➢ Built a CI/CD pipeline using GitHub Actions to automatically test and build a Node.js web application on every code push.
- ➢ Containerized the application using Docker and configured the pipeline to build and push Docker images to Docker Hub.
- ➢ Deployed the containerized application on AWS EC2 using SSH-based deployment, enabling automated application updates after successful pipeline execution.

Terraform + Ansible AWS Infrastructure Automation *Terraform | Ansible | AWSEC2 | Nginx | Linux | SSH*

- ➢ Provisioned AWS EC2 infrastructure and Security Groups using Terraform, including reusable variables and outputs for infrastructure configuration and server IP retrieval.
- ➢ Automated Ubuntu server configuration with Ansible by installing, starting, and enabling Nginx through a YAML-based playbook.
- ➢ Implemented Ansible variables, handlers, and Jinja2 templates to deploy a custom web page and automatically restart Nginx when changes were detected.
- ➢ Integrated Terraform-provisioned infrastructure with Ansible SSH-based configuration and troubleshot IAM permission, EC2 instance eligibility, and SSH host-key issues during deployment.

Certifications & Courses

- **DevOps - Zero To Hero**, TrainWithShubham
- **AWS Basics**, KodeKloud 2025-2026
